

## MICRO FITTINGS

A variety of Micro fittings is available with controlled surface finishes, electropolishing and optimal cleaning according to the ROTAREX Specification and SEMASPEC to meet U.H.P system requirements.

Laser marking identifies manufacturer, material and processes according to the ROTAREX Specification. All parts are laser marked to ensure full traceability.

Square, sharp, burr-free tube weld ends enhance alignment maintain tube wall uniformity, and promote weld repeatability.

Radius junction allows for a smooth flow transition and is designed to eliminate pockets and entrapment zones.

These Micro fittings provide compact U.H.P designs for use with orbital weld equipment.

## WELD FITTINGS

- Without shoulder
- With shoulder

### WITHOUT SHOULDER

This is the optimal configuration for butt welding using an automatic TIG welding machine.

### WITH SHOULDER

Automatic welding configuration with shoulder to facilitate meeting under difficult welding conditions such as not easily accessible or outside piping.
